

THE AUSTRALIAN SCIENCE TEACHERS JOURNAL

Index to Volume 36 (1, 2, 3, and 4), 1990 (Issues 116, 117, 118, 119)

FEATURE ARTICLES	ISSUE	PAGE
A constructivist model of learning used in the teaching of junior science. B Stanbridge	119	20
Biology education in China. Y Xiaohui	117	22
'Children's science': A decade of developments in constructivist views of science teaching and learning. R F Gunstone	119	9
Developments in science and technology education - some cross-cultural perspectives. C B Kings	118	39
Dissection and use of animals in schools. W Smith	119	46
Galileo and pendulum motion: A case for history and philosophy in the science classroom. M R Matthews	116	7
Making science more accessible to students: a curriculum based on cognitive criteria. B Stanbridge	117	7
Nuclear literacy and science education. H M C Eijkelhof	119	40
One school's approach to technology education: integration across the curriculum. D F Treagust & S H Mather	118	50
Science, technology and Australia's future. S Crean	118	29
Science, technology and society: social responsibility versus technological imperatives. R Cross	118	33
Social constructivist perspectives on the reform of science education. K Tobin	119	29
Student viewing patterns of science and technology television programs. J Metcalfe	118	46
Technology and science: meanings and educational implications. P L Gardner, C Penna & K Brass	118	22
The emergence of a relevant biology education for Nigeria. O J Jegede	117	27
The historical development of the pressure-volume law for gases. K C de Berg	116	14
The history and philosophy of science: What does it mean for science classrooms? T M Dana	116	21
The incorporation of history and philosophy of science in physics education in Denmark. H Nielsen & P V Thomsen	116	27
The new reproductive technologies (nRTs). J M Attwood	117	15
What will science education do about technology? P J Fensham	118	8
Who writes what for ASTJ? D F Treagust	119	36
JUNIOR SCIENCE NOTES		
Arbor Day, 1990. N George	116	38
Cooking up some fun. R McLucas	117	33
Good microbes in the kitchen. R Thurman	119	50
Learning electronics and enjoying it. G Williams	119	52
Mitosis: 'The dance'. C Donaher	116	35

Peer teaching and learning in science. M Mann	117	34
Practical science. J Ireland	116	38
Read science - the fantastic reality. D Potter	116	35
The determination of the density of cork: an alternative suggestion. W P Palmer	118	72
The game's the thing: rummy based activities in science. M O'Toole	118	73
Toys in space. C Donaher	119	54

BIOLOGY NOTES

A meaningful strategy for teaching genetic crosses. M Hackling	119	55
At home in the arid zone: living with drought and heat. J Sheehan	116	40
At home in the arid zone. J Sheehan	117	42
At home in the arid zone. J Sheehan	118	76
At home in the arid zone. J Sheehan	119	59
Growing pollen tubes. J Medcalf	116	48
Micro-organisms and decomposition: a learning cycle experiment. A Gibbs	116	44
Test tube respirometer experiments - yeast respiration, enzyme activity and notes on experimental procedures. S Scott	117	36
The action of enzymes. K Agostinetti	118	81
Translocation (sugar transport in plants): a model. H Rothenfluh	117	41

CHEMISTRY NOTES

A chemistry blast from the past. J Clarke	116	50
A practical approach to chemical equilibrium: 1. Reversibility and dynamism. G Connor	119	64
A practical approach to chemical equilibrium: 2. Approaching the equilibrium state. G. Connor	119	66
A quantitative investigation of mole ratios in a chemical reaction. N Lucarelli	118	83
Elementary profiles VII. R A Schibeci	116	51
Elementary profiles VIII. R A Schibeci	119	69
Foam column. M Bevan & C Commons	117	46
Local ecology - a chemical perspective. J Alexander & G Brady	117	47
Solving the problems of introducing industrial themes in chemistry. A Hofstein	118	85
Useful analogies for the teaching of equilibrium. R Thiele	116	54
Volumetric analysis assessment by computer. L. Meatam	119	63

EARTH SCIENCE NOTES

A radioactive decay analogue. N E Austen	118	88
Dead kangaroo prospect. L Stephens	116	57
Does the greenhouse effect work for glass houses? Report of a simple illustrative experiment. A Henderson-Sellers & R Nurse	117	49
Make your own petrological microscope. L Stephens	117	58
Radioactive decay. M Michie	118	87
Specimens for your class. L. Stephens	116	60

PHYSICS NOTES

A physics practical test instrument: a weighing machine. C Graham & M Hackling	117	68
A physics toy - uniform circular motion and simple harmonic motion. N E Austen	118	95
A simple demonstration of the 'power' of the Earth's magnetic field. L Poncini	119	81
A structured approach to scientific investigations. M W Hackling & L C Riemer	118	91
Astronomy by computers. J Broadfoot	118	96
Computer interfacing in physics. R Walding	116	63
Decay on the CRO. N E Austen	116	67
Density and refractive index. N Champion	116	61
Determination of 'g' using a uni-lab timer. A I McCheyne	116	61
How to get away with the elastic-limit - demonstrating plastic behaviour, annealing and work-hardening of pure metals. A R Pepper	116	65
Implementing computer aided science experiments. D Russell	117	63
Inducing student thinking. K Peterson	116	66
Semi-quantitative exercises illustrating the effect of pressure and volume changes for fixed amounts of air. K C de Berg	117	60
The magic of electricity: uses of the Van de Graaff generator. G Connor	119	71
Using the laboratory to teach the concept of projectile motion. E van den Berg & D van den Berg	119	78

TECHNOLOGY NOTES

Incorporating technology into Year 8 mechanics courses. P Garnett & L Tyson	118	65
Technology studies as a Year 9 optional subject. S McGirr	118	66
The technology of machines. G Evans	118	61

RESEARCH

Implementing Aboriginal content in the science program: A case study. S M Ritchie & J Kane	119	88
Student ideas on the velocity of light. E van den Berg & Sundaru	117	72
Students' conceptual framework in astronomy. M Finegold and D Pundak	117	76
The good, the bad and the balance: community advice to scientists and technologists. R A Schibeci	116	69
Training students in scientific reasoning skills. P Garnett, M Hackling & H Silver	119	83

SCIENTIST'S VIEWPOINT

Professor Fred Jevons	116	76
Professor Sue Serjeantson	117	88
